WOOD EXPERIENCE

LEAF

A sophisticated panel

Super transparent divider with frame in natural wood.

This elegant and discreet see-through shield will allow you to engage safely with everybody on your everyday life. Leaf is an anticontamination and antibacterial panel.

MADE IN ITALY

Frame in light natural wood miters glued together - 1 mm ExtraClear barrier (protective film on both sides to be removed).

EASY TO ASSEMBLE

Thanks to the support in natural wood, the divider can be placed on every surface, either horizontally or vertically.

READY IN STOCK

Bespoke sizes and finishes

EASY TO POSITION

The wood support fits the frame perfectly so that it stays fixed when lifted and moved.

ELEGANT

Wood is the perfect contrast with the super transparency of the glass and creates a soft and warm atmosphere, while the different available finishes (matt black, matt white or walnut) blend easily with the surrounding environment.

HYGIENIC

It is easy to clean with a non-abrasive cloth. Although the protective glass is well fixed on the frame, please proceed carefully for maintenance. At the moment, studies do not show that germs and bacteria survive on wood.

SAFE

In case of falling, its light materials do not cause any injury.

TECHNICAL DATA SHEET

	A	B	D	Through-hole	Weight
LEAF T001	97	67	4	89 x 59	1,5 kg
LEAF T002	106	76	4	98 x 68	1,8 kg
LEAF T003	76	56	4	68 x 48	1,2 kg

Sizes in cm

Customisable sizes.
